#### Fund's Strategy

Finethic Microfinance invests in microfinance institutions (MFIs). Investments are either direct or indirect. Direct investments are devoted to debt financing, chiefly through promissory notes or bonds issued by MFIs. Indirect investments are executed through various investment vehicles dedicated to microfinance, for instance funding vehicles like collateralized debt obligations (CDOs) or shares of funds specialized in microfinance. Special consideration is applied to the selection of investments and the solvency of loan recipients.

Loans to MFIs are only made in currencies which can be hedged against the base currency of the fund (USD). Currency risks are systematically hedged, the only exception is where a currency is officially pegged to the USD. The aim is to have a hedging ratio of 100%. Nevertheless, this ratio may vary on account of cash management and accrued interest.

Fundo SA Institutional Management has prepared this documentation exclusively for illustrative purposes. It has been developed on the basis of information received from carefully selected contributors. Nevertheless in no event does it constitute a part of the official fund prospectus or the marketing documentation issued by the fund's promoter. This document constitutes neither a sales document nor a solicitation in regard to the subscription of fund shares. Past performance is no guarantee of future results. The relevant risk factors attached to the investment policy and its implementation through specific financial instruments are described in the official fund prospectus.

#### Monthly commentary January 2018

With the data on financial institutions available in the industry benchmark index SYM50, we have looked back at the trends in the MSME financing industry during 2017. By doing so, we saw that the MSME market experienced its strongest growth since 2013, with total assets growing on average by 21% (as compared to 10% in 2016). Portfolio quality remained very stable with PAR30 at 5.2% in 2017 vs 5.0% in 2016. At the same time, overall profitability improved, with RoA of 2.2% (vs 1.9% in 2016) and RoE of 11.4% (vs 9%), signs of both an increased average loan size and improved productivity. Despite significant regional disparity, we note that the industry continued to do well in 2017.

The Fund generated a return of 0.31% in its USD share class. Two new loans were disbursed in Mexico and Palestine, totaling USD 1 million. Two potential investments are currently either approved, or already disbursed for February 2018, for a combined notional principal of USD 1 million. The Fund's portfolio risk concentration level has decreased, with concentration in top-5 invested countries reaching 39.9% of the portfolio invested in microfinance.
