Representative in Switzerland	Fundo SA
Paying agent	Credit Suisse

Fund's Strategy

Finethic Microfinance invests in microfinance institutions (MFIs). Investments are either direct or indirect. Direct investments are devoted to debt financing, chiefly through promissory notes or bonds issued by MFIs. Indirect investments are executed through various investment vehicles dedicated to microfinance, for instance funding vehicles like collateralized debt obligations (CDOs) or shares of funds specialized in microfinance. Special consideration is applied to the selection of investments and the solvency of loan recipients.

GBP shares are hedged in order to minimize the currency risk vs the reference currency of the fund (USD).

Loans to MFIs are only made in currencies which can be hedged against the base currency of the fund (USD). Currency risks are systematically hedged, the only exception is where a currency is officially pegged to the USD. The aim is to have a hedging ratio of 100%. Nevertheless, this ratio may vary on account of cash management and accrued interest.

Fundo SA Institutional Management has prepared this documentation exclusively for illustrative purposes. It has been developed on the basis of information received from carefully selected contributors. Nevertheless in no event does it constitute a part of the official fund prospectus or the marketing documentation issued by the fund's promoter. This document constitutes neither a sales document nor a solicitation in regard to the subscription of fund shares. Past performance is no guarantee of future results. The relevant risk factors attached to the investment policy and its implementation through specific financial instruments are described in the official fund prospectus.

Monthly commentary

February 2018

In Ecuador, the budgetary situation remains fragile given the high costs of social programs, despite a slight increase in the price of oil and the recent referendum result, which limited presidential term of office to two terms. Various measures have been taken to increase public income and support the local economy, including a withholding tax on principal and interest payments on debt instruments issued in countries deemed as "tax havens". This development may limit funding opportunities in the country. However, MSME specialized banks are currently lobbying with authorities to get an exemption, arguing that the external borrowings promote financial inclusion and support growth in the lower segments of the economy.

The Fund generated a return of 0.16% in its GBP share class. A new loan was disbursed in Panama for USD 0.5 million. Six potential investments are currently either under review, approved, or already disbursed for March 2018, for a combined notional principal of USD 6 million. The Fund's portfolio risk concentration level remained stable, with concentration in top-5 invested countries reaching 40.0% of the microfinance portfolio.
